## BRIDGES & STRUCTURES

The installation, management, maintenance and repair of bridges and structures are often subject to strict Health and Safety regulations. Our service record in this area is exemplary.

Over the years, we have project-managed a range of structural works in and around Britain's waterways. These include the repair, maintenance and construction of:

**Bridges**

**Fish Passes**

**Retaining Walls**

**Culverts**

**Rock Revetments**

**Fords**

In some circumstances, the work is best undertaken in dry conditions. In this instance, we will create a dam and pump the water out of the working area. Once complete, we can then carry out the necessary works efficiently, before restoring the watercourse back to its original state.

## HEALTH, SAFETY AND RISK MANAGEMENT

We are fully trained and certified to work in risk-associated environments where watercourse pollution must be kept to an absolute minimum. The fact that we enjoy an on-going relationship with many of our clients is testament to our experience, expertise and outstanding Health and Safety record.

## Marine & Civil Solutions Ltd
