CANALS & WATERWAYS

A legacy of the Industrial Revolution, the canals and waterways in England and Wales are a celebrated part of our heritage and culture. We specialise in maintaining and preserving these historical gems.

To protect the canals for generations to come, the continual preservation, maintenance and restoration of our canals is crucial to ensuring their upkeep – both in and along the water's edge.

We have undertaken a variety of canal and waterways projects, including:

Confined Space Works

Clearing Culverts and Waterways

Building and Repairing Canal Embankments

Plugging Redundant Canal Drain Plugs

In certain instances, we need to install dams, pump out the canal and undertake the works in dry conditions. After which, we will restore the waterway to its original state.

HEALTH, SAFETY AND RISK MANAGEMENT

We are fully trained and certified to work in risk-associated environments where watercourse pollution must be kept to an absolute minimum. The fact that we enjoy an on-going relationship with many of our clients is testament to our experience, expertise and outstanding Health and Safety record.
