DIVING SERVICES

It will come as no surprise to learn that with many marine civil engineering projects, our clients' requirements don't stop at water level. Quite often, a comprehensive solution is required for underwater tasks that is professional, cost-effective, and above all safe.

Our HSE registered dive teams are able to re-inforce clients with underwater solutions to meet the ever changing challenges of the marine construction industry.

These are some of the services we provide:

Underwater Video Inspection
Harbour Repair / Maintenance

Pipe Line Installation

Burning and Welding

Marine Construction

Mooring Installation / Maintenance

Salvage / Recovery
Standby / Emergency Call Out
Heavy Lifting

Diving Project Management
Option of Deploying Two Working Divers
From Our Custom Built Dive Container

As well as constructing structures from scratch, we also undertake emergency works to repair damaged structures.

HEALTH, SAFETY AND RISK MANAGEMENT

Our supervisors provide a positive and confident point of contact for our clients. As well as having a wealth of experience underwater, they hold ADC Supervisor Certificates as well as SMSTS Site Management and CPCS Lift Supervisor qualifications. All of our divers are also CSCS card holders, as well as being HSE Part 1 qualified and highly experienced. They take pride in their ability to complete tasks on time, and on budget.
